

## CPS Internet Payroll and Reporting Specifications for Apple Macintosh users

In order to use the Microsoft Desktop Connection Client required to run our Internet Payroll and Reporting software, your Macintosh computer must meet the following minimum requirements:

- **Processor:** Macintosh Power PC
- **Operating System:** Mac OS X version 10.2.8 or later
- **Memory:** 128 MB of RAM
- **Hard Disk:** 3 MB of available hard disk space temporarily required to complete installation; after installation, 1.1 MB of hard disk space
- **Network:** Connection to internet at a speed of 28.8 Kbps or higher

In most cases, printing reports to file is the only reliable option for Mac users. If a hard copy is required, you can print the report using software on your Mac computer. Although we do not provide extensive support for Apple products, we can provide you with instructions for accomplishing this.

Thank you for your interest in our Internet Payroll and Reporting software. If you have additional questions, please feel free to contact your payroll processor or our technical support team.
